About me

- International Education Consultant, specialising in ELT
  - Writing coursebooks, self-study books & teacher development materials
  - Teacher training
  - Materials development (offline and online)
  - Educational research
“Washing one’s hands of the conflict between the powerful and the powerless means to side with the powerful, not to be neutral.”

Paulo Freire
1. Use positive language
2. Create a positive classroom environment
3. Do whole class tasks
4. Collaborate
5. Challenge the textbooks
6. Link learning to community and outside world
7. Empower students
8. Create good storage systems
9. Look after yourself
10. Be human
1. Use positive language

Without trust, it’s very hard to achieve good learning. In challenging circumstances, many learners have trust issues – for very good reasons. Positive classroom language is one way in which teachers can effectively build trust.
Some general thought on classroom language

- Don’t assume any ‘bad’ action is deliberately negative
- Give students the opportunity to think about why they’ve done something
- Students like pleasing their teacher – so tell them when they have
- Small changes can have a big impact
- Use multiple languages
2. Create a positive classroom environment

Look at the following picture of a classroom in South Africa. It is typical of many classrooms around the world. Think about how some of these factors are relevant in creating a positive environment in this classroom. Share your thoughts in the chat box.

Weather; Seating; Clothing; Connection to the space; Language
How do external weather conditions affect learning?

Some students have uniforms, some don’t – how does this affect learning?

Does the classroom language exclude some students? Does it negatively impact on their ability to learn?

Do students feel that this is their classroom?

Does the seating arrangements maximise learning?

How do external weather conditions affect learning?
Ensure the same students don’t always sit in the worst places.

Don’t make an issue about clothing.

Decorate the walls. Let students decide what goes up. Don’t assume ‘it will all get ripped down’

Use L1s as a scaffolding device. Celebrate multilingualism.

Change and experiment with the seating. Be bold.
3. Do whole class tasks
Too often, we just tell students to work in pairs / groups without really thinking about it – or else we just use a teacher-fronted pedagogy
4. Collaborate
Create opportunities for learners to work together, and make your classes genuinely learner-centered.

This is especially important in writing tasks, which teachers often find challenging.

Collaborative writing can also have a significant therapeutic effect.
Once upon a time there were a family of father, mother and a little daughter. They were living in a small beautiful house. The father was working as a bakery and his wife helped him to make bread and sweets.

Their daughter is missing. They came home after a busy day, when they said “Hey Noura, where are you?” There was no answer. The mother started crying, and the father felt hopeless.

After hours of searching, they found nothing. They call the police and everyone they knew, but still no response. So the parents felt hopeless and started to imagine bad things to their daughter. Suddenly Noura jumped from behind the curtains, saying: “Don’t give up!”
Once upon a time there were a family of father, mother and a little daughter. They were living in a small beautiful house. The father was working as a bakery and his wife helped him to make bread and sweets.

Paragraph 3 (Stage 6)

The daughter is missing. They came home after a long day, when they said "Hey Noura, where are you?" There was no answer. The mother started crying, and the father felt hopeless.

Paragraph 3 (Stage 7)

After hours of searching, they found nothing. They called the police and everyone they knew, but still no response. So the parents felt hopeless and started to imagine bad things to their daughter. Suddenly Noura jumped from behind the curtains, saying:
The contents of a textbook are not value-free; they are generally shaped by a wide range of different forces.

Textbook bias can be directed towards many marginalized groups. Textbook bias can also be demonstrated by either the lack of representation of particular groups and identities, or else stereotyping or presenting them negatively.

As teachers, we have the opportunity – even the duty – to combat this bias.

5. Challenge the textbooks
After doing the compulsory text in class, you could ask these questions:

- What does this text say about your community / society?
- Do you agree? Why / why not?
- What are the problems of portraying your community / society in this way?
- What does the text not say about your community / society?
- Why do you think these facts have been omitted?
- What would be a more accurate way of portraying your community / society?
6. Link learning to community and outside world

Even more important in post-pandemic era – where so many children have had their education so negatively impacted. The community and local environment are huge language learning resources. There are huge social benefits to including them in your teaching.
ACTIVITY: Community map
1. Explain to students what a community map is.
2. Students work in groups of two or three. They discuss (and write down) what they think should be in a map of their community.
3. Combine two groups together. This larger group of four or six share their ideas, and agree on what they should include on their community map. They then draw this map.
4. Each group shares or displays their map with the rest of the class. Students should look, in particular, at the different things which each focuses on. If possible, also compare it to an official map of the area.
7. Empower students

In challenging circumstances, it’s extremely important that learners develop confidence, feel valued, have agency and believe that they can have a positive impact on the lives of others.

This can be achieved through relatively simple straightforward classroom techniques.
Once upon a time there was a letter ‘a’. The ‘a’ lived on her own.

Q: How do you think the ‘a’ felt?

Q: How can we make the ‘a’ feel better?

Now there were lots of ‘a’s

Q: How does the ‘a’ feel now?
Once upon a time there was a letter ‘a’. The ‘a’ lived on her own.

Q: How do you think the ‘a’ felt?

Q: How can we make the ‘a’ feel better?

Now there were lots of ‘a’s

Q: How does the ‘a’ feel now?
8. Look after yourself

Rule 1: Don’t blame the students

“A child’s current behaviour often reflects an essentially sane response to an untenable set of life circumstances.”

Madge Bray

- I’m hot
- I’m cold
- I’m tired
- I’m angry
- I’m hungry
- I’m depressed
- I’m worried
- I’m in pain
- I’m bored
- I don’t understand what I have to do
- I can’t say what I want to
- I’m confused
- I’m stressed
- I’m sitting in a different place than usual
- I’m working with someone I don’t like
- I don’t feel well
- I’m sad
- I had a bad experience this morning
- A teacher bit me
- My Mum / Dad bit me
- A teacher was angry with me
- My Mum / Dad was angry with me
- My Mum / Dad is ill
- My Mum / Dad is sad

Rule 2: Don’t blame yourself

“I was blindsided by the emotional aspect of teaching—I didn’t know how to handle it. I was hurt by my students’ pain, and it was hard for me to leave that behind when I went home.”

Alysia Ferguson Garcia

There are limits to what you, as a teacher, can do and what you can give to each student. For some, not even your maximum will be enough.
Ways to look after yourself

Lower your expectations

Be professional but not familial

Talk to your colleagues

Talk to your manager(s)

Keep a teaching diary

Look after yourself physically

Take some personal time in the day

Talk to your friends and family
9. Create good storage systems

Good admin and document management is important in all education settings – but especially in challenging circumstances, which often have a shortage of time, material and personnel resources, and where teacher churn and turnover is high.

This is true for physical and digital storage.
10. Be human
You’re a teacher, but you’re also a person.

It’s important for students to know this.

(I’m the one underneath)
Student pictures at the entrance to a language school in Jakarta, Indonesia.
Teacher pictures in the same school, hanging next to the students.
1. Use positive language
2. Create a positive classroom environment
3. Do whole class tasks
4. Collaborate
5. Challenge the textbooks
6. Link learning to community and outside world
7. Empower students
8. Create good storage systems
9. Look after yourself
10. Be human
