IELTS 2

Is creativity possible, desirable and/or necessary in the IELTS classroom?

Sam McCarter
What is creativity?
If you hear a voice within you say, ‘You cannot paint,’ then by all means paint, and that voice will be silenced.

Think left and think right and think low and think high. Oh, the thinks you can think up if only you try.
Creativity is just connecting things. When you ask creative people how they did something, they feel a little guilty because they didn’t really do it, they just saw something. It seemed obvious to them after a while.

Creativity is contagious, pass it on.
Helping students to use their creative side is about giving them the opportunity to express themselves by teaching them how they bring together, or synthesise, ideas, evaluate them and come with something ‘new’ for them, and perhaps other people.

It is about thinking and writing ‘something new’ for them, which they have never thought before. This is a concept of creativity in the widest sense.
