1. Hand out a picture dictionary sheet where the children have to write the names of the animals they've learnt and maybe add others.
2. After writing the translation into Portuguese, the children can write down the names of the animals in other languages, for example, in the child's mother tongue (many of our classes have children of different nationalities).
3. The children will draw (or download from the internet) the animal and the flag of their classmates' nationalities in the upper boxes, and write the words in the different languages.
