picture 1

In the middle of the picture there's a girl sitting on a sofa. I think she's in a living room. She's holding a tablet.

There's a cushion next to her on the left and a schoolbook on the right.

On the wall behind the girl there's a photograph.

I think it's a photo of the girl and her mum.

In the photo, there's a tree next to the mum and the girl is holding a cat.

In the top left of the room, there's a mini helicopter!

It looks like a flying bubble. Inside there's a sleeping cat.

In front of the sofa on the right, there's small a robot dog!

In front of the sofa on the left, there's a small table.

On the table there's a big robot eye.

Next to the sofa on the left, there's a tree. There are some pears on the tree.

But it's not a real tree, it's a hologram. The robot eye on the table is projecting it.

Look at the photo on the wall again. Next to the photo on the right, there's a window.

Outside the window there's a flying car. It looks like a small spaceship and you can see two people inside.

You can also see some buildings. There are trees growing on top of the buildings.

Next to the sofa on the right, there's a special cupboard with vegetables growing inside it!

In the top part of the cupboard, there are tomato plants and in the bottom part of the cupboard, there are carrots.

Finally, there's a lamp above the cupboard. It's coming down from the ceiling.

There's a light, of course, but it's also raining from the lamp down onto the cupboard!

Future learning

picture 2

In the middle of the picture there's a boy sitting at a school desk. I think he's in a classroom. He's drawing a picture of a tree on a tablet. The tablet is part of the desk.

There's also a mobile phone on the desk on the left.

On the wall behind the boy there's a class rules poster.

Next to the class rules poster on the right, there's a window.

Outside the window there's a flying school bus!

Also on the right of the room, next to the boy and in front of the window, there are two trees. One is an apple tree and the other is a cherry tree. They're real trees growing inside!

Look at the class rules poster on the wall again. Next to the poster on the left, there's another window.

But this is not a window to the outside, this is a special window for a lunch-making machine!

You can see a robot arm coming down that's making a sandwich and another robot arm that's making a drink.

On the left of the lunch window, there's another window to the outside.

You can see a girl coming to school on a flying board.

Under that window, on the left of the room, there's another desk.

It also has a tablet on it.

Finally, between the two desks there's a small robot.

It's got a round body, like a bucket, and a round head too, like half an orange!

It's also got two arms and two legs.

The robot's holding a watering can. I think it's going to water the trees.
